

GUIDE TO FIND YOUR RING SIZE

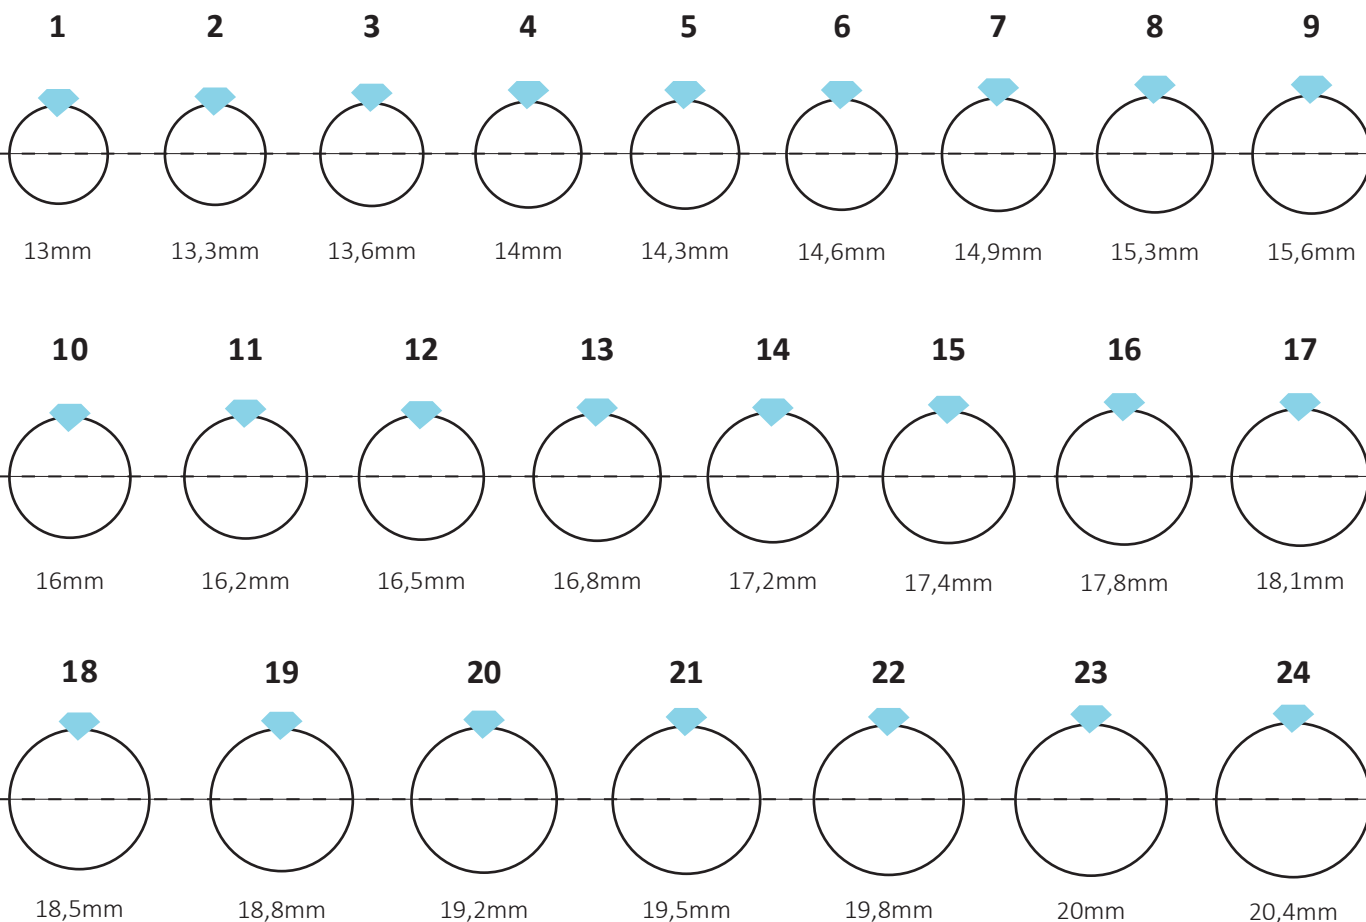

How to easily determine the size of the finger

IF YOU HAVE A RING OF THE RIGHT SIZE

Simple and intuitive, this option allows you to check the size of the ring by comparing it with the figure below. It is sufficient to position the ring of which you want to take the measurement on the various circles and verify which, among those present, adheres better. **Note:** the comparison must be made with the inner edge of the ring you have.

IF YOU DO NOT HAVE A RING TO COMPARE

In case you didn't have a ring to make a comparison, you can discover the size of your finger by performing some simple instructions: fold the sheet along the dotted lines, cut out the semicircles that you think will fit your finger better and start performing some tests. Insert your finger in the various holes and check which is the most correct size for you.

IMPORTANT

Print and check the size: the ruler below must measure 10cm.

If it does not correspond, check that the print scale is 100% on A4 paper.
